

GROWER: FOUR C'S NURSEY
Craig Scroggie

CROP: All Nursey crops

APPLICATION METHOD:

Foliared sprayed 1 gal containers of typical nursery crops.

RATES:

2 quarts of C-CAT per 100 gallon of water per application

RESULTS:

Cut production time by as much as 30%

GROWERS COMMENTS:

"Linear establishment is incredible with C-CAT. Ligustrum, Lorapethum, all my crops are finishing ahead of schedule. Root establishment has been extremely aggressive. This allows us to cut 4 to 5 weeks off a 17 week production average, that is substancial. Time is money in the nursery industry"

Craig Scroggie owner Four C's Nursery
