

GROWER: BETHEL FARMS

LOCATION: ARCADIA, FLORIDA

CROP: SOD

RESULTS:

“We started to use C-CAT last year and we have continued using on all types of grasses. C-CAT makes the grass look very green on the top, and has a strong root system on the bottom, even on the ribbons it looks healthy with no stress at all. It also makes fields solid, in less time and really helps with the lifting. I can fill pages and pages trying to describe what the C-CAT does, but if you start to use it, you will be the same as me, without words. I recommend using it anytime, at any rate with any grass, and do not wait for later, do it today.”
