

---

**GROWER: WESTBY CORPORATION**

**LOCATION: LAKE PLACID, FL**

**CROP: BAHIA**

**RESULTS:**

“This letter of endorsement is based on personal experience. Westby Corp. has used the C-Cat product in a number of ways. One was to see if we could increase our Bahia seed production, and a second was in the area where the sod yields was only at a maximum of 20-25% for several years.

Both of these applications were successful in that, on the Bahia seed field, we increased production by some 50%, and on the sod where we were only lifting 20-25%, we were able to lift more than 80% of that field. We are presently continuing to put C-CAT out, to see if we can decrease the number of days between lifts on Bahia. The application rate of 1 gallon per acre of C-CAT was prescribed by Roger Helms.

Based on the results seen on our fields, I firmly believe you to will be pleased with the results you obtain.” Wayne Godwin, General Manager
