

GROWER: RICHARDSON FARMS

LOCATION: MARSTON, MO

CROP: SOYBEANS

APPLICATION METHOD: Foliar sprayed 3 quarts per acre application with Roundup and Fungicide.

**FIELDS: 1 AND 2 IRRIGATED
3 NON-IRRIGATED**

Rate: 3 quarts each spraying

RESULT: “When applied to soybeans at the full rate, C-CAT appears to increase yields 7 – 10 bushels per acre, especially in a dryland situation where prolonged plant stress is involved.” Blake Richardson
