## PROTOCOL FOR SOYBEANS

### OPTION 1

- 1) IN ROW with starters- 1-2 gallons of 3-18-18 per acre mixed with 5-10 gallons of solution.
- 2) EARLY BLOOM- foliar spray 2 gallons of 3-18-18 per acre mixed with 10 gallons of water. This application can be mixed with other sprays at that time.
- 3) POD FILL- foliar spray 2 gallons of 3-18-18 per acre mixed with 10 gallons of water. This application can be mixed with other sprays.

### OPTION 2

- 1) TRIFOLIATE or EARLY GROWTH- foliar spray 3 gallons of 3-18-18 per acre mixed with 10 gallons of water. This application can be mixed with glyphosate spray.
- 2) EARLY BLOOM- foliar spray 3 gallons of 3-18-18 per acre mixed with 10 gallons of water. This application can be mixed with fungicides sprays.
- 3) OPTIONAL POD FILL- foliar spray 2 gallons of 3-18-18 per acre with 10 gallons of water. This application can be mixed with other sprays.

**Note:** 3-18-18 can be mixed with Herbicides, Fungicides, and Insecticides. Always mix small amount for compatibility.

**Caution:** 3-18-18 can make herbicides and fungicides more active. Consult with a sales representative for more information.
